

## Immediate Release

October 23, 2006

### **Organ Transport Systems, Inc. (OTS) Contracts with Forward Thinking Partners for Growth and Financial Strategies**

Forward Thinking Partners (FTP) and OTS today announced a definitive agreement whereby FTP will consult with the company on financial and financing strategies. FTP will be assisting in the selection process of multiple investment banking firms and similar parties as part of the OTS growth strategy.

Headquartered in Indianapolis, IN - Forward Thinking Partners (FTP) specializes in business optimization. Thanks to the collective experience of its managing members, coupled with their vast network of partner companies - FTP provides an extensive portfolio of valued professional services.

“We are excited to have been awarded this contract with OTS,” said Gary Phillips, managing member of FTP. “OTS is a wonderful company with outstanding executive leadership and advisors. The organ procurement market is a wide open market of opportunities and OTS is positioned to make a major global impact on the way we procure and transport donated organs.”

**Organ Transport Systems, Inc.**, headquartered in Frisco, Texas - is a biomedical company engaged in developing, patenting, and commercializing portable hypothermic, oxygenated preservation and transport technology for human organs. OTS plans to redefine human organ transplantation with its Life Cradle™ product line through better preservation and extension of the window of viability.

Due to the nature of this engagement only limited information can be shared, additional information will be made available at a later date.
